

Costain Oil, Gas & Process Limited has a long and successful background in design, engineering and construction management for the oil and gas production, refining and gas processing and nuclear industries.

Company Profile

The Company offers its clients a complete project execution capability from feasibility studies and front-end design through to construction and plant commissioning. Costain has a total commitment to the effective management of safety, with rigorous training to ensure safe working practices and the development of each of its employees to meet their maximum potential.

Working Environment

The Company is located in South Manchester very close to the International Airport and major road and rail links. We have pleasant offices in a semi-rural area very close to the Cheshire border in an area of the Country that rates highly for 'Quality of Life'.

Salary and Conditions

Starting salaries for Graduates will be circa £23,000 depending on level of qualifications. Conditions of employment include a matched contribution stakeholder pension scheme, private medical scheme, 25 days' holiday per annum and initial assistance with finding accommodation.

Selection

The Company intends to offer opportunities for Graduates over a wide range of disciplines in 2008 and 2009. We have a training programme that is accredited by the IChemE and the IMechE and complies with the requirements of the IET, the ICE and the RICS. Candidates should expect to gain a lower second class Honours Degree as a minimum from a course accredited by the relevant Professional Institute. Applications should be made on a Standard Application Form or by submission of an up to date CV and forwarded to the address below. Selected candidates for interview are invited to spend a day at our Manchester Office where they are shown our work, meet some of our recent Graduates and Senior Managers, and have a formal interview.
